

Proposal for Comfortable Light for Marine Animals and Plants.

○Hidetaka Kato¹, Kazuo Oda¹, Kiyotaka Yokoi¹
1. Kyocera corporation

We will introduce the results of experiments pursuing high-quality light substituting for mercury lamps and metal halide lamps, which are currently in use in aquariums.

Examples include eelgrasses cultivation experiment, sea lettuces cultivation experiment, corals breeding experiment, on the theme of photosynthesis. At the same time, we will also introduce the results of beautiful color change of corals bred under the high-quality light.
